Portfolio

Backend-leaning Full Stack developer (Go, Kotlin, Vue 3 / Nuxt 3). On Cadremploi.fr (1.5M monthly visits), I work on the site rebuild, technical SEO and GDPR compliance, from code to deployment on GCP.

EDUCATION

MASTER'S LEVEL DIGITAL TECHNOLOGY ARCHITECT

42 / Paris / November 2015 - March
2020

LANGUAGES

French - Native

Portuguese - Native

Spanish - Bilingual

English - Fluent

EXPERIENCES

FULL STACK DEVELOPER

Figaro Classifieds, Paris

Since May 2023

Building and evolving Cadremploi.fr, a French executive job board, within a product team: high-traffic platform (1.5M monthly visits) under strict regulatory constraints (GDPR).

- **Full rebuild of Cadremploi.fr** in Vue 3 / Nuxt 3: **#1 contributor by commits**, owner of the job detail and authentication components, rebuilt the homepage.
- **Technical SEO** across all three layers (Nuxt, Go API, Kotlin monolith): schema.org, internal linking, automated sitemap, **100% rollout of the new taxonomy** with a 301 redirect plan.
- **GDPR compliance API in Go**, top contributor by volume: account deletion, 6-year legal retention, and a concurrent, idempotent **reconciliation batch** that **purged 917 orphaned accounts**.
- **Go search API in hexagonal architecture**: 9 Elasticsearch search strategies with merging and deduplication, 8-badge business module.
- **Merged 2 microservices into a single API** (~15,000 lines migrated) and shipped **92 production releases** of the Kotlin / Oracle monolith. GCP, Kubernetes, Terraform.

SKILLS

TECH SKILLS

Languages

Go, Kotlin, TypeScript, Swift

Frontend & mobile

Vue 3, Nuxt 3, React, Jetpack Compose, Flutter

Data & search

PostgreSQL, ElasticSearch, Oracle

Infra & tooling

GCP, Kubernetes, Docker, Terraform

PROJECTS

Family Tracker — personal project

Real-time family location sharing.
Android (Kotlin / Compose), web, Go API.

family-tracker-web-z4ur.onrender.com/

PDFland — personal project

Offline Android and web PDF editor.
Flutter, React, shared Go engine.

pdfland-web.onrender.com

Farol — open source (Swift)

macOS terminal for coding agents: 9 merged PRs (git graph, conflicts, multi-account).

FULL STACK DEVELOPER

T2 Technology, Torcy

January 2020 – May 2023

Software development for medical imaging (PACS, exam printing, online services) in a small agile team.

- **Kotlin DICOM exam transfer service** (DICOM / HL7 interoperability, multi-vendor equipment) and a **Go API** for secure online exam access.
- Medical printing software in **C++ and C#**: performance and memory management on large images.
